

How do I know which eID I am logging in with?

Use the exclusion method to find out which eID you have associated with your signature profile. You have to look at the series of numbers you are presented with:

Private NemID

Always starts with 9208, followed by a long string of numbers.

Private MitID

Long combination of numbers and letters (not starting with 9208).

NemID employee signature

Always consists of 8 digits.
